Virtual office

by IROUNMO

The virtual office is designed to help all those who want to inform about mobility and are not able to come to the Office of the International Relations.

Gather Town is a software application for web conferencing with the ability to watch virtual "rooms" in which participants are located, and

the ability to move and interact with others participants based on room locations.

Students will be able to apply via the link for application located on the website:

www.iro.unmo.ba. The link will be shared as well

via the Instagram profile of the Office for international relations.

Alicia Martinez - her experience of being and exchange student at "Dzemal Bijedic" University of Mostar

By IROUNMO

My name is Alicia Martinez and I am from Spain, a student from the University of Almeria. The choice of my Erasmus city was totally accidental. I had been thinking for some time about the Erasmus experience, to do it during the third year of my studies, in 2021. So, me being a well-organized person, I decided to first visit the International relations office at my university. They proposed me to do the exchange for the second semester of this same year. It's not what I had in mind but... Why not?

They showed me destinations I could go to. And there I saw it... That enchanting place, with an antique style that made you transport yourself instantly to the old Yugoslavia, a long river crossing the city, the famous Old Bridge, and a lot of nature around (and I love nature!) So, without thinking about it for a second, I said: I WILL DO IT AND THIS IS MY DESTINATION! I started to investigate more about the city, its past, its most emblematic places, and its culture. I knew I was getting into a completely different adventure than what I am used to.

As it was a spontaneous and last-minute decision, I didn't have much time for the preparations as usual but, the UNMO buddies and some Erasmus students who were there years before helped me with EVERYTHING I needed and even more (accommodation, better connections to get there, mobile internet, banks, etc). I'm using this opportunity here, again, to thank you and ask for forgiveness for being so annoying with so many questions.

When the quarantine was over, and the city was slowly returning to a normal situation, it was spring (my favorite season) and Mostar seemed like a fairy tale. The mountains dressed in green, the Old t+Town full of colorful flowers, around the river abundant of trees.

I was able to make plans again with my friends, swim in the cold river, spend the afternoons drinking the delicious Bosnian coffee, visit the small villages around, spend the night close to the river, enjoy the live Bosnian music, visit the stunning waterfalls, climb to the hill and admire the magic of the night and thousands of other wonderful escapades.

Without a doubt, my Erasmus at the UNMO was a great decision and even though COVID-19 happened, I came back to Spain with special people in my heart, magical landscapes, and incredible experiences.

I know that my story in Bosnia and Herzegovina is not over yet!

When I arrived in Mostar, I was lucky to have Erasmus students who were there the first semester and still had not returned to their countries, so they helped me with the adaptation to the city. I also had the opportunity to meet the great ESN team.

As it is not a very famous destination among the Erasmus community, there were very few Erasmus people, so that helped us to interact more with the locals (a really great idea). The residents of the city of Mostar are the nicest people I know. They are all friendly and helpful. They taught me their culture, their traditions, and their past. Getting to know all this has been one of the things I value most about my stay in Mostar.

NATIONAL TECHNOLOGY DAY

By IROUNMO

National Technology Day on January 6th recognizes how technology changes the world and looks to the future of technology. Each year, from the wheel to smartphones, the day honors technological achievements that impact our daily lives.

Imagine the world without technology. In our daily lives, we can't take a step without coming into contact with a form of it. Yet, the world is abuzz with technology! Outside of the healthcare sector, tech jobs are among the strongest and fastest-growing divisions. And let's face it, technology is at the center of most jobs these days. Some of the many places we encounter technology include:

- Agriculture
- Healthcare
- Education
- Entertainment
- Foodservice
- Security

Another area where technology thrives is in the area of communications. We use various tools to communicate with people, and we use these tools a lot! Consider all the ways we convey a message in today's world.

- Telephone – Since the first “hello” traveled across a wire, telephones have kept us connected. Wires? Who needs wires today?
- Email – Email is still relevant today. Beyond the spam, businesses rely on email to communicate with their employees and patrons. In addition, emails keep us connected to loved ones who don't quite love the latest technologies.
- Video – Video meetings have revolutionized how we stay connected. We keep in touch with family, attend school, speak to our doctors, and conduct business, all from a distance.
- Text – Whether it's a quick, short message, or a long conversation, text messages easily keep us connected.
- Letter – Yes. People still write letters. Whether typed or written with old-fashioned technology like pen and paper, the letter still gets a message across.
- Website – This technology produces a variety of messages. It's a vehicle for ideas, news, and business.

Humanitarian action "Los Rosales"

By IROUNMO

On the occasion of the New Year's holidays, the Association of Health Care Students, "Dzermal Bijedic" University of Mostar, headed by the president of the association Dalila Bajrić and members: Sajra Tufek, Adna Golić, Dalida Žugor, Murisa Latić, Mubera Begluk, Nadina Ačkar, Ema Jakirović, and Sara Kulak, came up with the idea of organizing and implementing a project of donating packages for the residents of the Los Rosales center.

The Center for Children and Youth with Special Needs has 70 children of preschool and school-age, while the total number of wards of this center is over 130.

The action of donating packages was organized on December 30, 2021 in the premises of the center of Los Rosales. In addition to the action of donating packages, the students used the opportunity to volunteer and spend one day hanging out with the residents of the Los Rosales center. This action aims to make the children of the center happy and thus establish cooperation with the Los Rosales center so that they can make some joint projects together soon.

UNMO Projects

By IROUNMO

TACEESM aims to improve quality of higher education in partner countries in the field of architecture and civil engineering and enhance its relevance for the labour market needs and in accordance with European growth and development strategies.

More specifically, the project objectives are:

- 1. To increase capacity building for study in architecture and civil engineering offered both in English and in local languages at BSc and MSc levels**
- 2. To develop, accredit and implement new courses in architecture and civil engineering at the BSc and MSc levels according to Bologna requirements by the end of the project**
- 3. To develop innovative academic environment for architecture and civil engineering programs throughout the cooperation with industry.**

The Sports Logos

By IROUNMO

The Sports Logos is a scientific journal of sports and education issued by the Faculty of Education - Department of Sport and Health in Mostar. The first issue of the journal was published in 2002 and is intended for anyone wishing to publish their own achievements in the field of kinesiology as science and related sciences. It comes out twice a year, with 2017 all the papers being published in English. The journal is indexed into EBSCOHost, INDEX COPERNICUS and COBISS.BH databases

Youth Day

By IROUNMO

Youth Day is a holiday dedicated to the youths of a country.

It's first uprising was in Soweto where no new high schools were built between 1961 and 1972.

Youth Day recalls the day in 1962 when young people were killed during the independence movement. The day celebrates young people and their contribution to development. It recognizes that the young people are the future leaders and must be treated as such.

It was initially known as Soweto Day among the supporters of the ANC, but was officially made a public holiday after Nelson Mandela became president in 1994.

BOSNIAN DICTIONARY

- FAKULTET- FACULTY
- ISPIT - EXAM
- PARCIJALNI ISPIT - PARTIAL EXAM
- OCJENA - MARK
- UNIVERZITET - UNIVERSITY
