DEBATING COMPETITION AT DZEMAL BIJEDIC UNIVERSITY OF MOSTAR

BOSNIAN DICTIONARY

The 8th of Mart

The 8th of March is International Women's Day. It's a global day to recognize and celebrate women's social, economic, cultural, and political achievements. It's also a time to raise awareness of the progress made toward achieving gender equality and the work to be done. The beginnings of International Women's Day can be traced back to the early twentieth century. It emerged from the activities of labour movements in North America and Europe and reflected a growing call for women's equal participation in society. Marking of the International Women's Day first took place on March 19, 1911, in Austria, Denmark, Germany, and Switzerland

Ramadan

By IROUNMO

The holy month of Ramadan is the ninth month of the Islamic calendar. Ramadan is twenty-nine to thirty days long. Most Muslims fast for eleven to sixteen hours during Ramadan, from dawn to sunset. However, there are regions, such as polar regions, where the period between dawn and sunset may exceed twenty-two hours in summer. Therefore, in areas with continuous night or day, some Muslims follow the fasting schedule observed in the nearest city with sunrise and sunset, while others follow Mecca time. Ramadan is a month of spiritual reflection, self-improvement, and heightened devotion and worship. The annual observance of Ramadan is regarded as one of the Five Pillars of Islam. During the fasting period Muslims cannot drink or eat. They also must abstain from intimacy, sinful speech, and behavior. Fasting is an obligation ‘fard’ for all adult Muslims who are not acutely or chronically ill or travelling. The elderly, pregnant women, mothers who are breastfeeding, people suffering from diabetes or women during periods also do not have to fast. The meal the fast starts with is referred to as suhur, and the daily fast ends with the meal called iftar.

BEST Mostra : HackAtHome

By IROUNMO

The BEST Mostar initiative organized a hackathon for students and high school students with the participation of leading experts in the fields of information technology and marketing. The hackathon jury for this year comprised Denis Musić, an associate professor at the Faculty of Information Technology, along with Dinko Pehar and Nebojša Jegdić.

Apart from the hackathon, BEST held a job fair where students had the chance to enhance their knowledge by attending hard and soft skills workshops conducted by top-notch experts in the field of information technology and marketing. Students could interact with the booths to learn more about BEST's work and explore employment and internship prospects. Mistral, QSD, Comtarde 360, Walter Code, AtlanzBH, MSS, and COS were some of the companies that exhibited their booths.

Over 100 hackathon participants took part in this prestigious event, and several hundred students and young people visited the booths at the job fair. The BEST Mostar initiative is committed to cultivating passion and innovation in the field of information technology among young people and offers opportunities for training and networking with leading companies in the industry.

Mimea team

By IROUNMO

Can you introduce yourselves?

We are a team of four: Vedad Traljo, Selma Memic, and Lana Mustafic are second-year students at the Faculty of Information Technologies (FIT), while Haris Gusic is a first-year student at FIT. Professor Denis Music is our mentor. We are very interested in IT for several reasons; creativity of IT and programming is definitely reason number one. We also have a lot of experience with various hackathons and international IT certifications

Why did you choose the Faculty of Information Technologies?

We chose the Faculty of Information Technologies primarily because of our interest in the IT field, the many opportunities that FIT and the Dzemal Bijedic University of Mostar provide for their students, and the knowledge gained at FIT.

Why "Mimea"?

We tried to find a name that was specific and easy to remember. We played with letters, and Mimea stood out as the best option.

**How did you come up with the idea to apply for the competition?**

We came up with the idea to apply by chance. We read about the competition application on the website of our faculty, so we agreed that it would be nice experience for us. By reaching the global finals, we were positively surprised because we started from scratch, but our effort still paid off. This success arose from pure friendship and the desire to expand our knowledge, so perhaps that combination is the secret to our success!

What is your idea for the competition?

Our idea for the competition is a smart mirror whose purpose is to be an aid in nursing homes, both for patients and employees. The smart mirror monitors continuously blood pressure, pulse, and blood sugar. Mimea has a voice assistant (through which you can activate every function), video calls with family, music, childhood photos, face recognition to preserve the privacy of each patient, breathing exercises, and physical exercises. It is our goal to make Mimea, at least, a part of the daily life of people with dementia, Alzheimer's, and depression easier.

What do you expect from the competition?

This competition has already brought us a lot of new opportunities, knowledge, new acquaintances, and a greater desire to learn, so we expect that as a result of everything. In the next part of the competition, we will do our best to place as well as possible, and we hope that luck will also serve us

University welcomed professors and pupils of the Mostar Gymnasium

On the 17th of March, professors and students of Mostar Gymnasium came to visit the Džemal Bijedić University of Mostar.

After the welcome of the University Promotion Team, together with their professors, pupils visited the amphitheater of the Faculty of Humanities, where they were introduced to the work of the University as well as the possibilities of studying at one of the faculties and university study programmes.

The vice-rector for international and inter-university cooperation, prof. dr. Rijad Novaković addressed the students. After that representatives of the faculties and university study programmes spoke about the advantages and benefits of studying at the Džemal Bijedić University of Mostar.

After the presentations pupils enjoyed breakfast and then visit the faculties where they had the opportunity to see in person everything the faculties have to offer to the students. Students also had the opportunity to ask questions and find out more information about studying at a particular faculty or university study programme.

Debating Competition at Dzemal Bijedic University of Mostar

Gymnasium Bugojno 1 was a winner of a two days long debating competition organized by the Student Union of Dzemal Bijedic University of Mostar, Faculty of Law and Association of law students with the support of the OSCE Mission to Bosnia and Herzegovina. The semi finals and final took place today on 17.03.2023. The competition was held in the moot courtroom of the Faculty of Law.

After the opening of the debating competition and introductory debates, teams of Gymnasium Bugojno 1, Electrical Engineering School "Salih-Salko Ćurić" 3, "Pro et Contra," and Gymnasium Bugojno 2 progressed to the semifinals. The teams debated on "Should user comments under articles on portals be banned?"

"Should hate speech on the Internet be punished more severely?" was the topic saved for the finale, with the teams "Pro et Contra" and Gymnasium Bugojno 1 facing each other.

Samir Imamović, a from the "Pro et Contra" team, was the best debater in the competition. After the final debate, the participants had an opportunity to see the presentation of the Faculty of Law and the Dzemal Bijedic University of Mostar. All participants were awarded with the certificates, including the certificate for the best debaters and everyone who contributed to the organization and implementation of the debating competition.
